### Department of Public Works – Street Division

#### Overlay Program

Sept. 7, 2018

#### **Columbus Dr. (5<sup>th</sup> St. to Adler Rd.)**

The City Street Division has started the Columbus Dr. project. We have started at the intersection of Adler Rd. & Columbus to repair the Water Utility road patch. Starting today there will be a crew working on replacing eight (8) sanitary Manholes from 5<sup>th</sup> St to Adler Rd. This will take about 5 to 8 days to replace the sanitary manholes. Starting sometime next week, the Street Division will have another crew starting with the street reconstruction. This will entail removing the concrete slabs in the street, installing drain tile in front of the curb and gutter and hauling in more road base to add to the existing road base. We will also be replacing sidewalk ramps at intersections, repairing storm sewer catch basins and doing spot repairs of the existing curb and gutter. When the Street Division is done with our work, American Asphalt will be in to pave the street with 3" of asphalt. Our goal is to have the project completed by the first part of October.

There will be some time when you will not be able to get in or out of your driveway during the day while we are working. If you need to get out during the day, you should park your vehicles on one of the side streets to assure you can get out of your home. We will make sure you have driveway access at the end of each day. If you need driveway access for an emergency please notify one of the workers on site.

Thank you for your cooperation.

Any questions or concerns please contact the Street Division @ 715-486-2081

Dean A. Schiller

Street Superintendent
